## Introduction

Quilling is one of the crafts or the art form which is found to be mostly done by the homemakers / Ladies, in some cases by the gents after completing their regular routine work. It is a craft that is usually made with the help of cut papers of about ¼ inches in width. It is glued on the handmade papers with the help of the patterned designs as per the pattern to be made.

This craft has gone through many transformations and changes as per the ages through new techniques, materials and styles developed from time to time changes. Some of the works of paper quilts are placed on the jewelry boxes, quilled lock boxes, stands, ladies purses, frames, work baskets, tea caddies, coats of arms, storage boxes and wine coasters etc.

The craftsmen who is show casing this craft belongs to the Anegundi part of Karnataka that is situated at the Koppal district of the Karnataka state of India. Anegundi is situated at Hampi in the north banks of the Tungabhadra River. The artisan is said to hail from the Kadapa district of Andhra Pradesh who had shifted to this place after her marriage who engages some of the people around her living area into this craft after their household works.

Quilling is said to be originally hailing from the monks and nuns of the renaissance period who took forward this craft to the places whichever they went and passed by. Paper Quilling was found to be done as cards, decorative items that were used to ornament the look of the things of their day to day living.

The rolled color strip is glued to the main coil to complete the jewelry pattern.

## Tools and Raw Materials

The following are the tools and raw materials used for making the Paper Quilling at Anegundi:

- **Quilling Paper:** Size and length of the paper determines how the paper quilled looks.
- **Needle Tool:** It is used to scroll and create rolls with the twisting papers.
- **Fine Tip Slotted Tool:** Creases in the rolls are generally made with the slotted tool.
- **Adhesive (Glue):** It is used to apply on the tips of the quilling sheets to stick firmly.
- **Tweezers:** It is generally used to create eccentric coils and to pull the Centre's.
- **Circle Template:** To measure the coil width.
- **Scissors:** It is used to cut quilt papers in the required size and shape.
- **Rings:** It is used to be inserted through the holes that can be placed on the ears.
- **Pliers:** It is used to cut the required length of rods with the pliers.
- **Quilt Strips:** Different coloured quilt strips of ¼” are used as per the design pattern to be made.
- **Measuring Tape:** It is used to determine the length and width of the pattern required.
- **Pencil:** It is used to mark the points on the paper sheet where the patterned paper quilts can be fixed.
- **Scale (Ruler):** It is used to place the quilt strips in straight lines easier laying of the design quilt papers.
- **Ear Wires:** It is used as a component that helps in wearing decorative items on the ear.

## Making Process

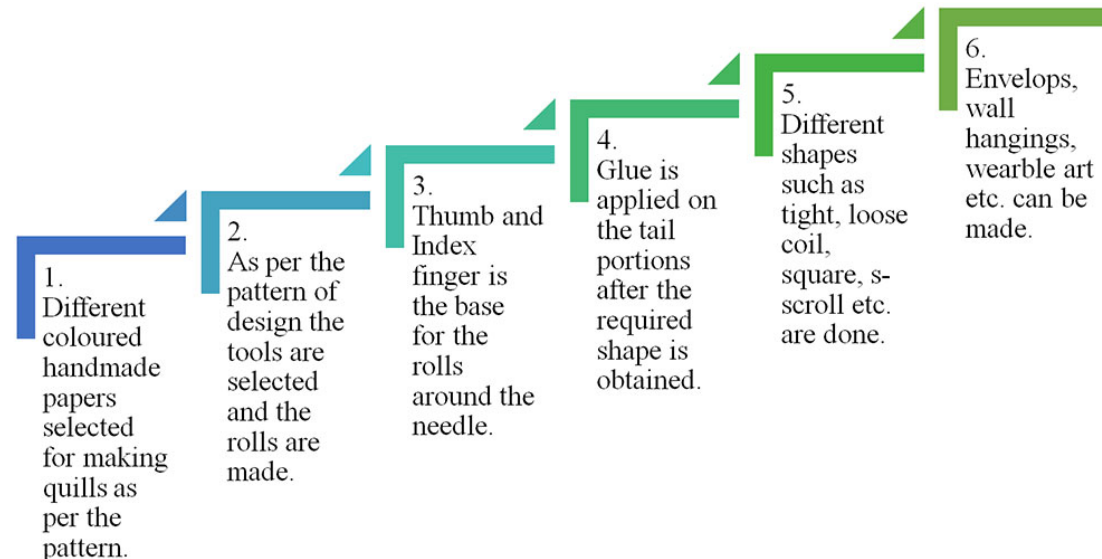

Paper Quilling are generally made with the handmade papers and the quilling strips that are used in different colours to obtain the design patterns. Quilling with paper requires basic tools like slotted tool, needle tool or use of toothpick or needles for making of the paper quilling's.

With the help of slotted tool that is like a pencil like instrument with a slit or a slot, at the top portion that creates a tiny crimp at the center and slide the paper into the head of the tool. Generally with the use of thumb and index finger with little pressure to roll the paper around the needle. The strip pieces can be used by cutting pieces of paper in equal size or buy a pre-cut paper where the length of the strips depends on the patterns that has to be obtained.

After the strips of papers are rolled off to the required need glue is applied at the tail portions and fixed firmly. As the adhesive (glue) is fixing pinch the coil to the required shapes either of a leaf or of a triangle of an ear as per the need. Designs with the quilled angel helps in creating beautiful patterns that will make the craftsmen feel cherished and remembered about the results.

Some of the basic shapes of the coils are as follows tight coil, loose coil, Teardrop, curved teardrop, marquise, curved marquise, (asymmetric) heart scroll, square, simple loose coils and s-scroll.
