Future Possibilities

Aim of Project

- Facilitate healthcare to chronic patients.

Aim of Project

- Facilitate healthcare to chronic patients.
- Helping them to meet up to the health schedule.

Aim of Project

- Facilitate healthcare to chronic patients.
- Helping them to meet up to the health schedule.
- Organize themselves so they can lead a stress free life.

Aim of Project

WHY?

Aim of Project

WHY?

- Chronic conditions will not go away. A challenge!

Aim of Project

WHY?

- Chronic conditions will not go away. A challenge!
- A dramatic increase in chronic conditions necessitates facilitation of the stakeholders of the health sector.

Aim of Project

WHY?

- Chronic conditions will not go away. A challenge!
- A dramatic increase in chronic conditions necessitates facilitation of the stakeholders of the health sector.

According to April 2008 Market Research by ORG IMS, the healthcare sector has increased by 13% since 2007. 20% of this is contributed by chronic medication.

Aim of Project

WHY?

- Chronic conditions will not go away. A challenge!
- A dramatic increase in chronic conditions necessitates facilitation of the stakeholders of the health sector.
- Innovative treatments and high value drugs, equipment and gadgets prove as probable drivers of sales.

Fills in the details

The image shows a mobile application interface for 'MedCare'. The screen has a teal header bar with the Windows logo, the text 'MedCare', and status icons for signal, volume, and time (10:30 am). Below the header, there are four input fields: 'Drug' (a text box), 'Type' (a dropdown menu), 'Quantity' (a dropdown menu), and 'Days' (a row of seven buttons labeled S, M, T, W, T, F, S). Below these is a 'Schedule' section with the text 'select time'. It contains four rows of time slots: 'Morning' (6, 7, 8, 9, 10, 11 am), 'Afternoon' (12, 1, 2, 3, 4, 5 pm), 'Evening' (6, 7, 8, 9, 10, 11 pm), and 'Night' (12, 1, 2, 3, 4, 5 am). At the bottom is a teal bar with 'Options' and a keyboard icon, and 'Done'.

*Consecutive
Tests*

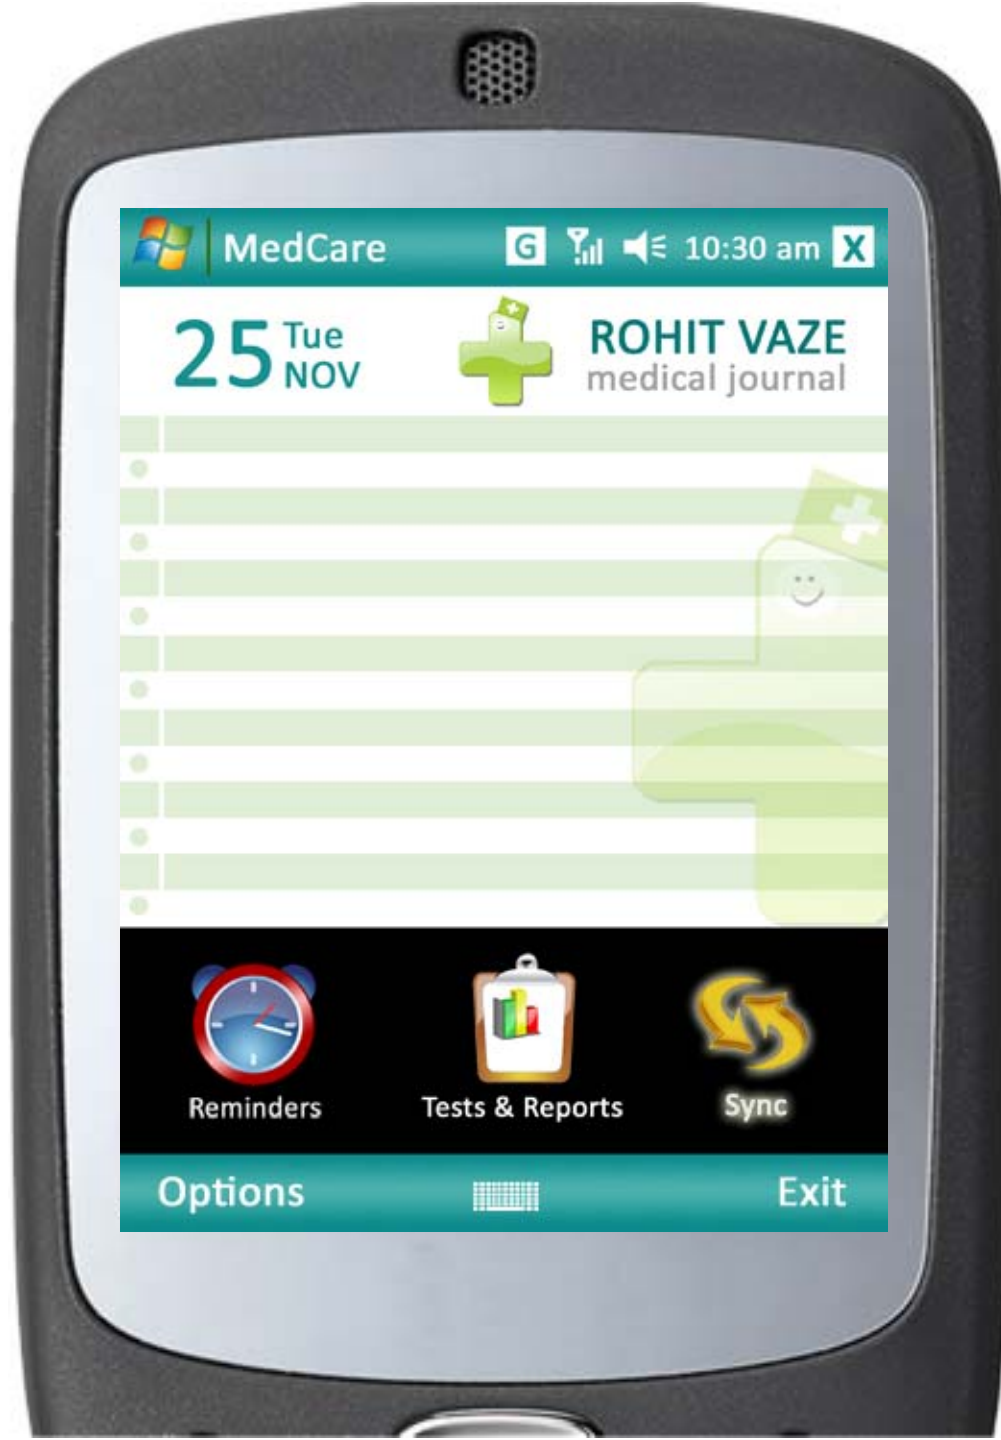

Clicks on
update and
sees that the
system has
downloaded
the test.

Opens the file
to view the
report.

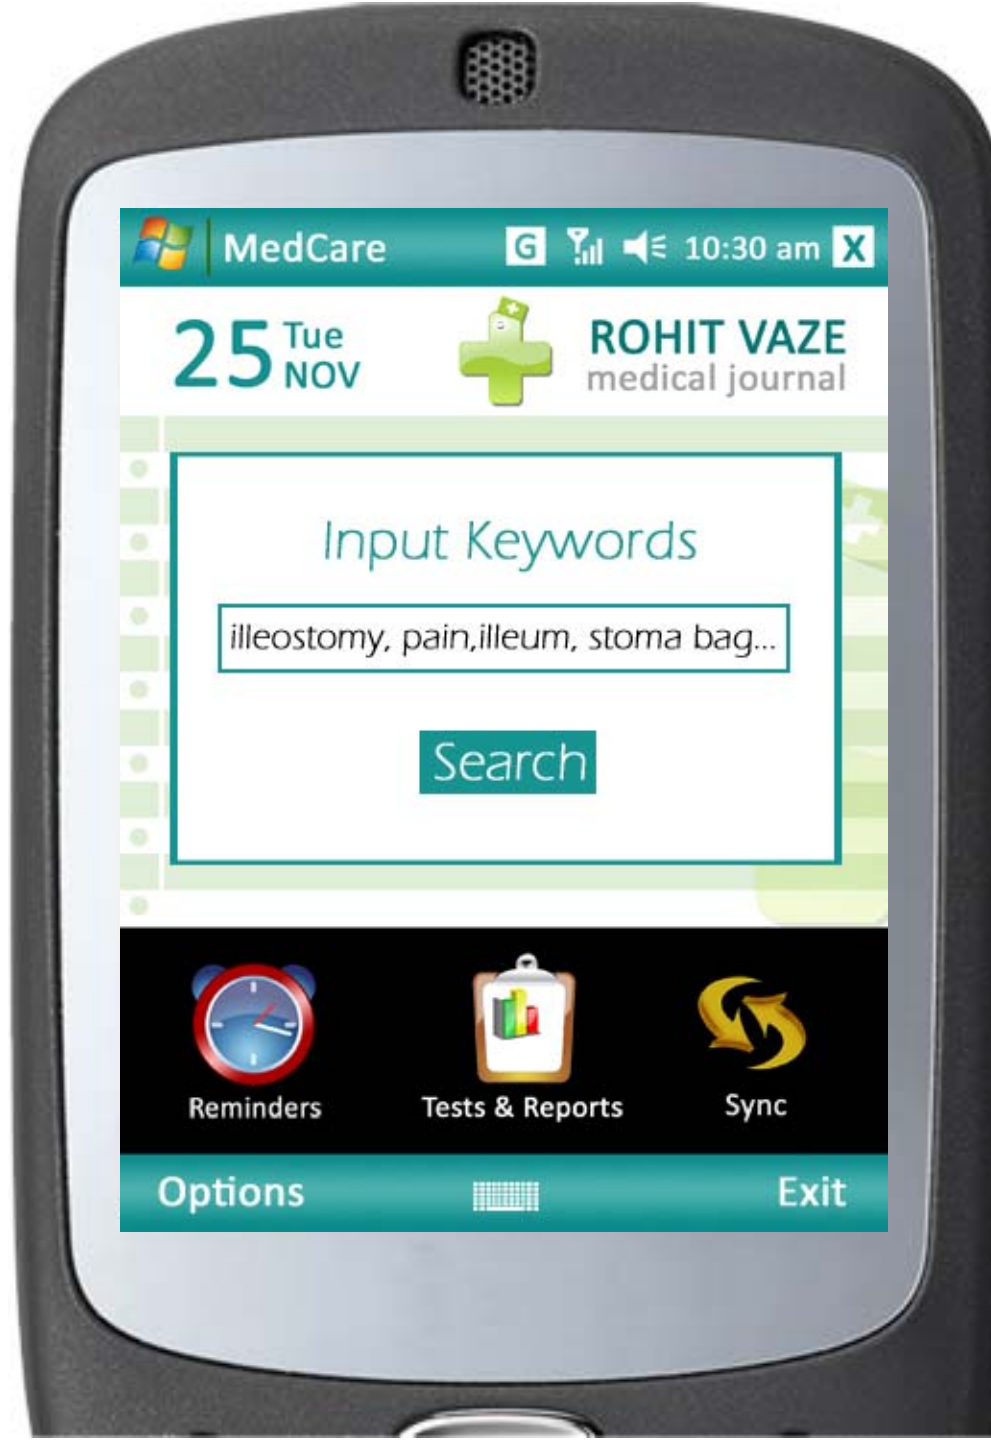

He clicks on
Sync to sync
his phone
with his wife.
Now he can
share the
dynamic diary
with Neha.

He has a
problem
while
changing his
illostomy bag.
He searches
for remedies.

Gives in
keywords to
search.

System shows
a patient
entry.

The dynamic diary also records what activity the application has been through at what time.

It sounds
alarms for his
reminders

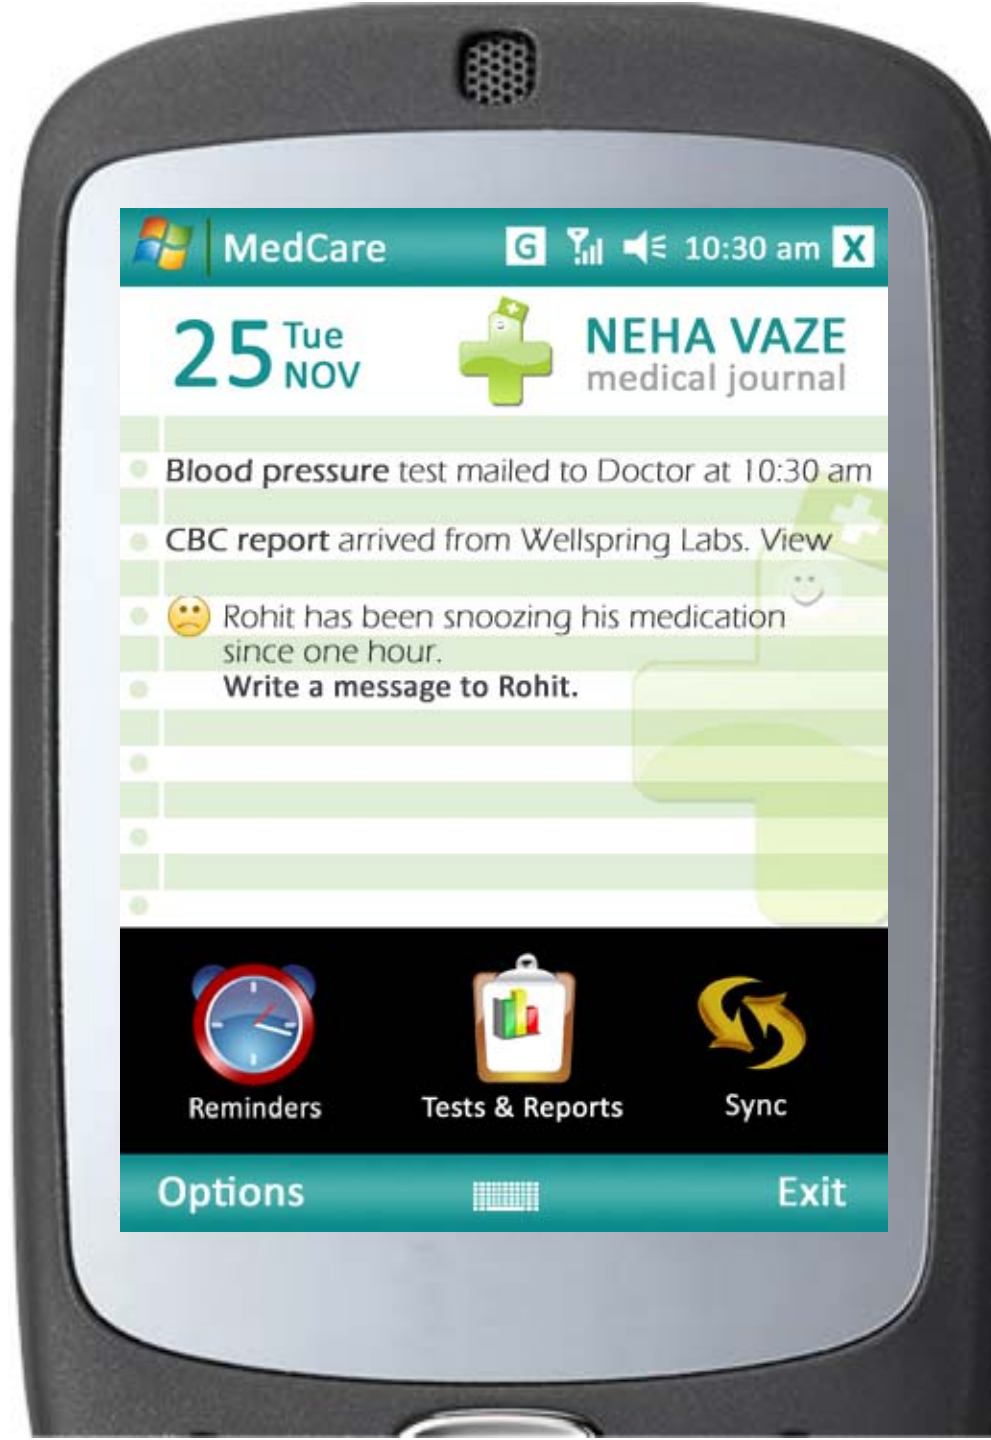

If he snoozes
then the
visual
emotion
changes.

If he does not have his medicines for a long time after his alarm rings, the caretaker gets an update on her diary.

It gives her the option of writing back to Rohit to remind him of taking his medicines or it will have an impact on his health.

User Testing & Feedback

User Testing & Feedback

Why? To understand the usability issues of interface.

The testing was task based and not time based.

MedCare.exe

3 tasks were given to a user.

User Testing & Feedback

Task 1: Setting a new reminder

Your doctor has prescribed to you one tablet of Augmentin. You are supposed to take this tablet everyday at 9:00 am. You have to set this reminder in the application.

User Testing & Feedback

Task 2: Saving a test done at home and mail to doctor

You are advised to note down your blood pressure and weight for 2 weeks and email it to your doctor. You have to input today's blood pressure and weight and email it.

User Testing & Feedback

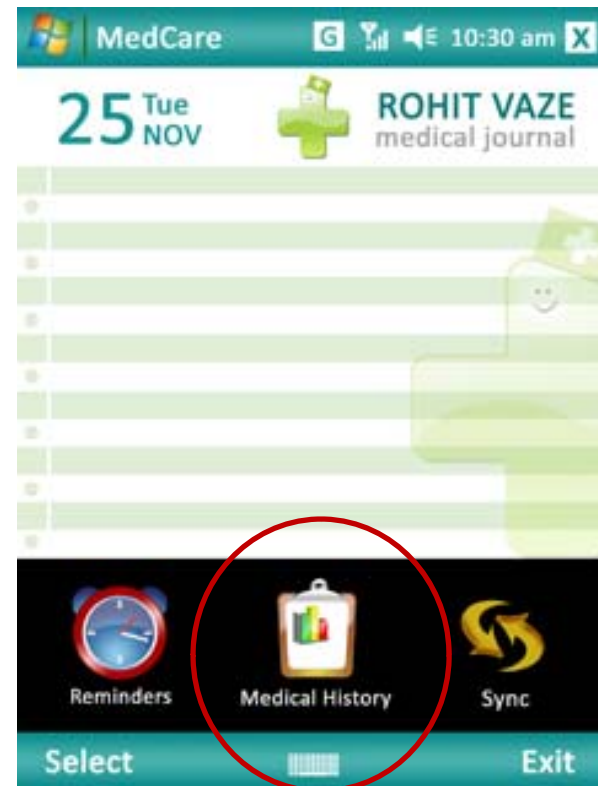

Task 3: View test that has come from lab.

You have done a Complete Blood Count (CBC) report yesterday evening. Your Lab in charge told you that he will send it to you by 9 in the morning. You have to view the reports and update them.

User Testing & Feedback

“Where is the Medical Reports Button?”

User Testing & Feedback

- How do I select all days?

A check box stating all days

- How do I select a time on half hour basis.

- What if I want to add 2 drugs at the same time?

Options and Save & New

The screenshot shows the MedCare application interface. At the top is a teal header bar with the Windows logo, the text 'MedCare', and system icons for Google, signal strength, battery, and time (10:30 am). Below the header, the 'Drug' field is set to 'Augmentin' (circled in red). The 'Type' is 'Tablet' and 'Quantity' is '1'. The 'Days' field shows a row of seven buttons labeled 'S', 'M', 'T', 'W', 'T', 'F', 'S' (all circled in red). The 'Schedule' section is titled 'select time' and contains four rows of time slots: 'Morning' (6, 7, 8, 9, 10, 11 am), 'Afternoon' (12, 1, 2, 3, 4, 5 pm), 'Evening' (6, 7, 8, 9, 10, 11 pm), and 'Night' (12, 1, 2, 3, 4, 5 am). The '10' slot in the Morning row is circled in red. At the bottom is a teal bar with 'Options', a barcode icon, and 'Done'.

User Testing & Feedback

- What about the dose of the Drug?

Option of Auto drop down of drugs with their different doses.

The screenshot shows the MedCare mobile application interface. At the top is a teal header bar with the Windows logo, the text 'MedCare', and status icons for Google, signal strength, battery, and time (10:30 am). Below the header, the form fields are as follows:

- Drug :** A text input field containing 'Augmentin'.
- Type :** A dropdown menu showing 'Tablet'.
- Quantity :** A dropdown menu showing '1'.
- Days :** A row of seven buttons labeled S, M, T, W, T, F, S, representing the days of the week.
- Schedule :** A section titled 'select time' with four rows of time slots:
 - Morning :** Buttons for 6, 7, 8, 10, 11 am. The 8 am slot is selected with a white circle.
 - Afternoon :** Buttons for 12, 1, 2, 3, 4, 5 pm.
 - Evening :** Buttons for 6, 7, 8, 9, 10, 11 pm.
 - Night :** Buttons for 12, 1, 2, 3, 4, 5 am.

At the bottom is a teal bar with 'Options' on the left, a barcode icon in the center, and 'Done' on the right.

Future Possibilities

Future Possibilities

- Target Market can shift from Niche to General, allowing Acute therapy and Hospital therapy caregivers to use the application.

Future Possibilities

- Target Market can shift from Niche to General, allowing Acute therapy and Hospital therapy caregivers to use the application.
- Assist healthcare providers in hospitals by integrating it in hospital therapy.

Future Possibilities

- Target Market can shift from Niche to General, allowing Acute therapy and Hospital therapy caregivers to use the application.
- Assist healthcare providers in hospitals by integrating it in hospital therapy.
- May also lead to rural areas and be made available in Indian languages with simpler interface.

THANK YOU.
