Satish

Falguni

Services provided

- Product Design
- Graphic Design
- User Interface Design
- Brand & Identity

Some award winning products
Business World and NID Design Excellence.

Microhardness Tester

Solemates

Ultrasound Machine

Colour Doppler

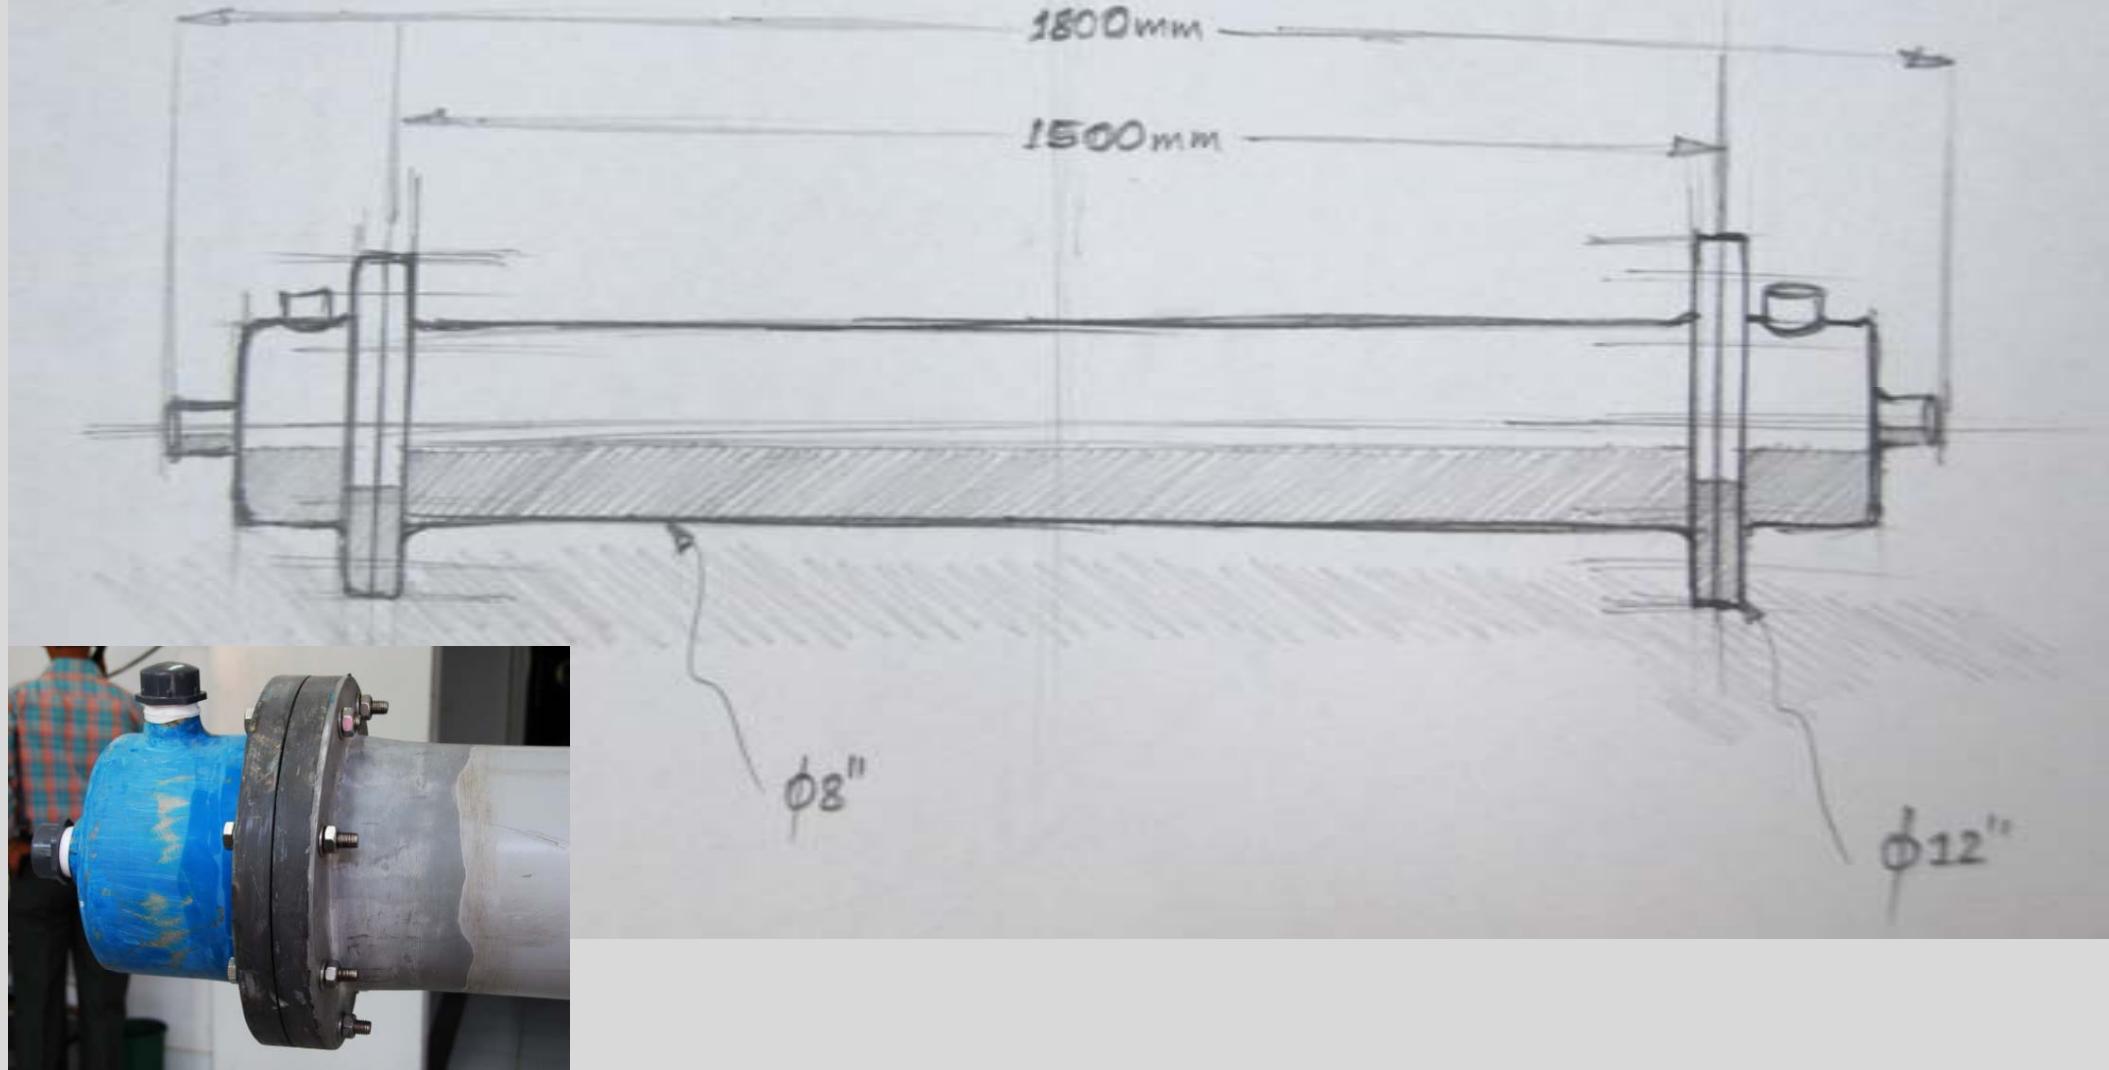

Methodology of the Design Process

- Client will submit a Product Brief.
 - First Meeting.
 - Idea Sketching to sort out preliminary issues.
 - Concept Sketching.
 - Solid/Surface modeling of chosen concepts.
 - Renderings.
 - Detailed Concept Presentation (feature explanation)
 - Refining of the chosen concept.
- } Care has to be taken during this process to choose the right materials considering the cost, availability, time and finally, manufacturing process.

Projects handled at Design Directions and their respective deliverables

- Industrial Water Filter
 - 3 Concept Renderings.
 - 1 Finalized Concept Rendering.
- Vegetable Cart
 - Interaction between various Users and the Product.
 - Concept sketches.

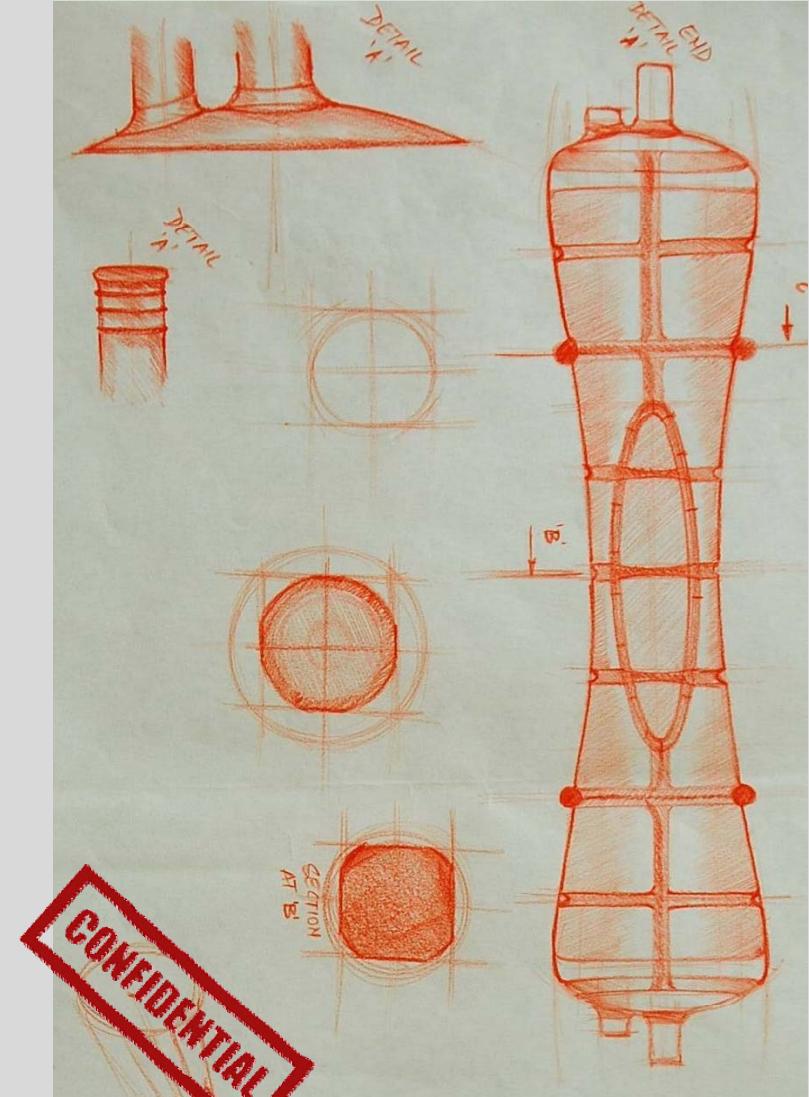

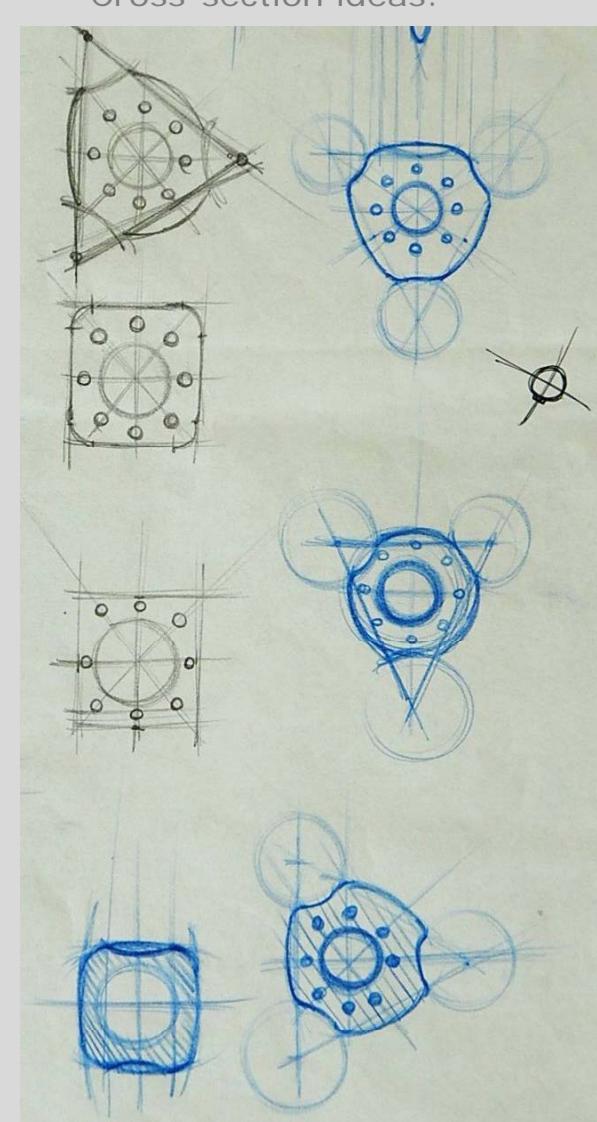

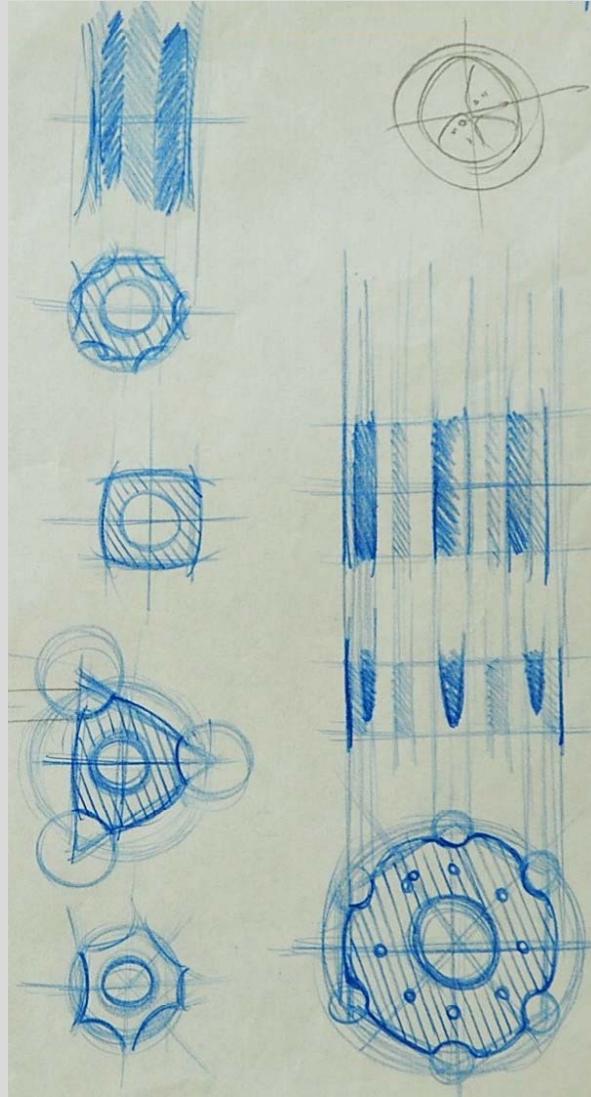

Initial look of the product.

Product Brief

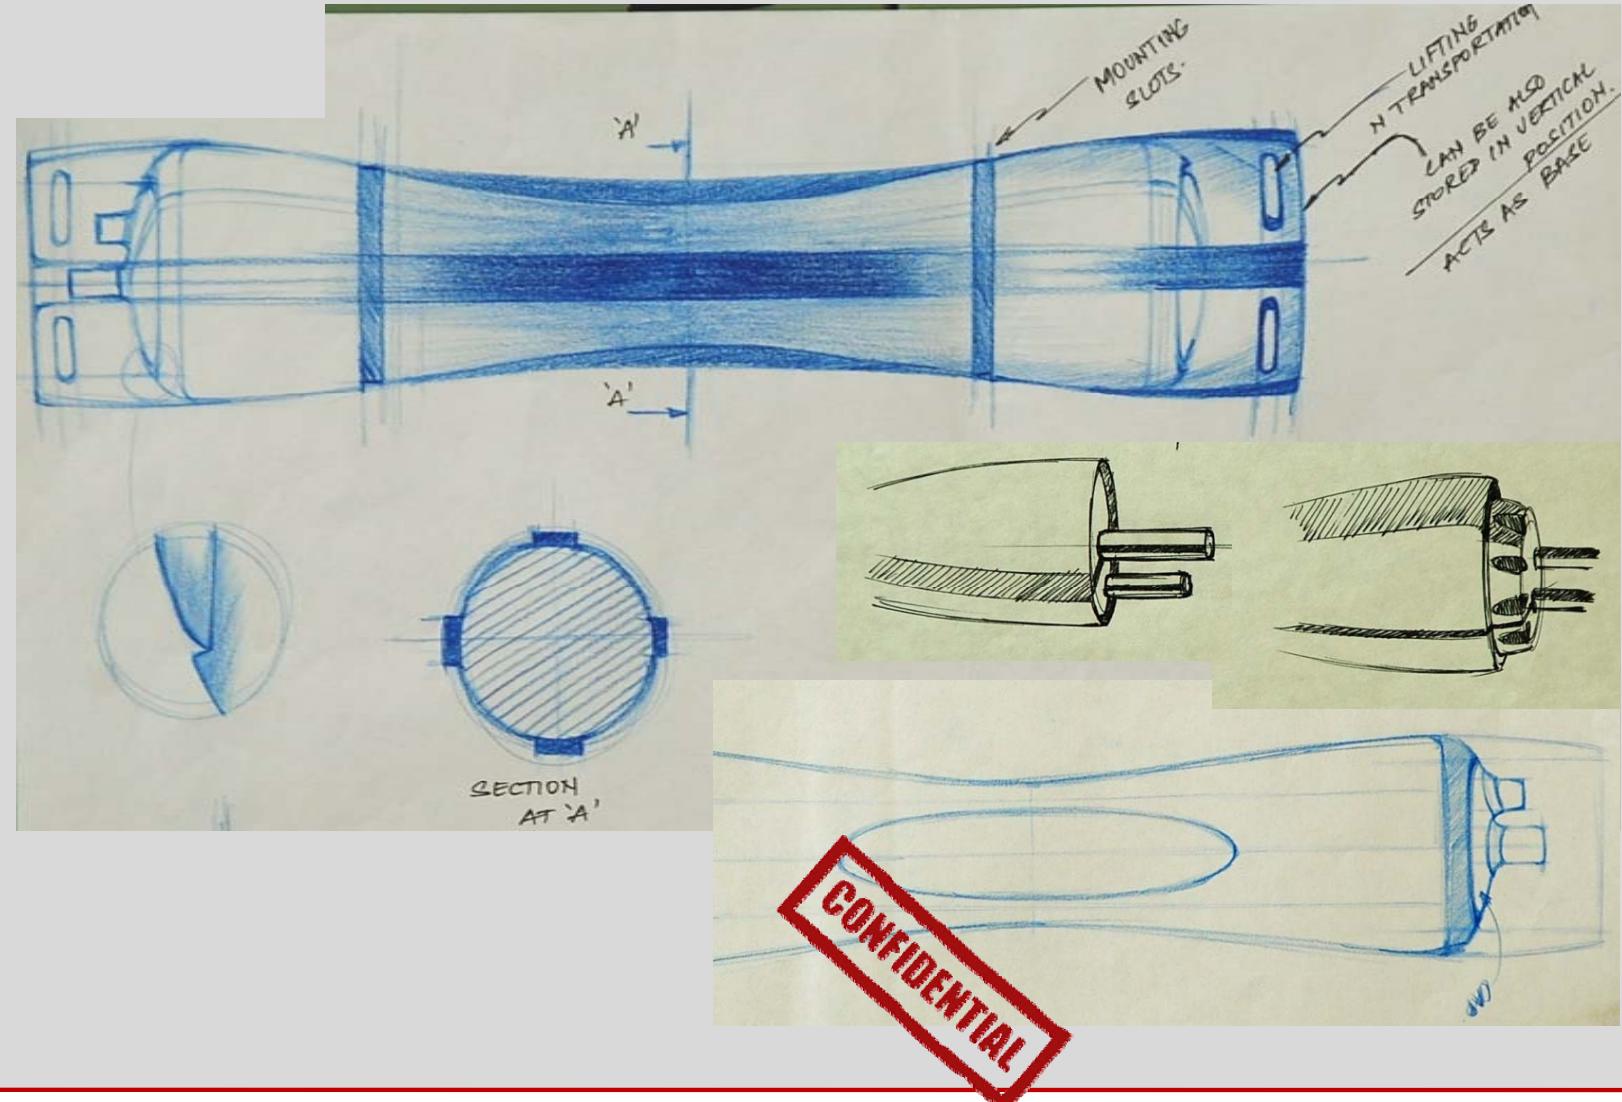

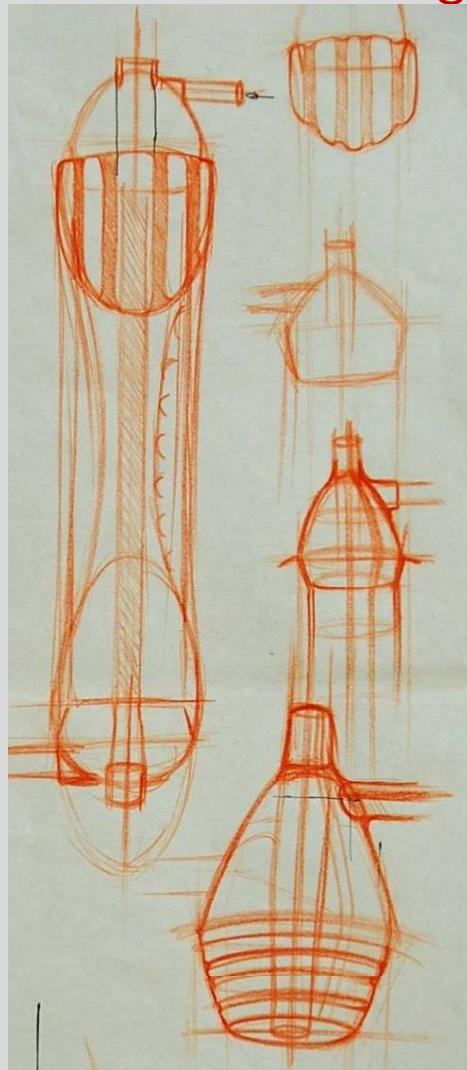

- Redesign of existing product
- Easier to assemble and organize
- Easier to service
- Make it aesthetically appealing

Idea sketching

Learning during the Period of Internship

- Client is always the King. (but its not necessary that the King knows it all!)
 - Never be satisfied with Engineering Derived Design.
 - The concept of “Free Design” and “Add-on Design”
 - Find ways and means to relax (so that you are “always creative”)
 - Secrecy is every designer’s “Secret Weapon” (the more secret the weapon, the more effective it is!)
