# Nature and Form

- The definition of ‘nature’
  - The sum total of the forces at work throughout the universe  
[www.dictionary.com](http://www.dictionary.com)
  - Refers to the phenomena of the physical world, and also the life in general  
[www.wikipedia.com](http://www.wikipedia.com)
  - The whole system of existence, forces and events of physical world that are not controlled by human being  
[www.freedictionary.com](http://www.freedictionary.com)
- The definition of ‘form’
  - Shape and structure of an object  
[www.freedictionary.com](http://www.freedictionary.com)
  - external appearance of a clearly defined area, as distinguished from color or material; configuration  
[www.dictionary.com](http://www.dictionary.com)

# Elements

- The most important elements that attracts a human being towards nature are:
  - Sight      Radiance and/or contrast in colours  
                 Detail  
                 Composition
  - Sound      Unique  
                 Sharpness  
                 Vibrancy
  - Smell      Sweet  
                 Freshness
  - Touch      Soothing  
                 Smooth  
                 Rough

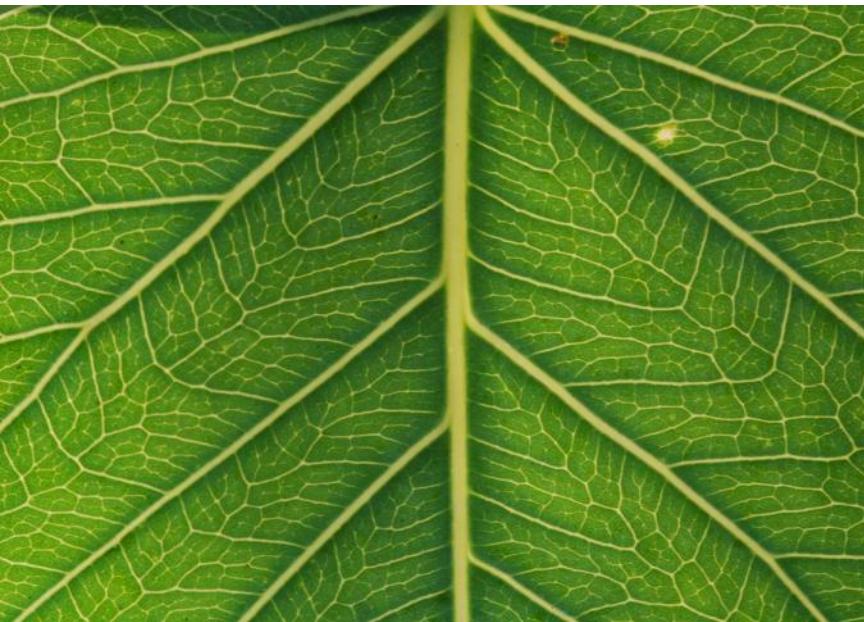

# Aim

- Understand and analyze natural objects or activities
- Regenerating a moment of natural experience through form
