

Color variations

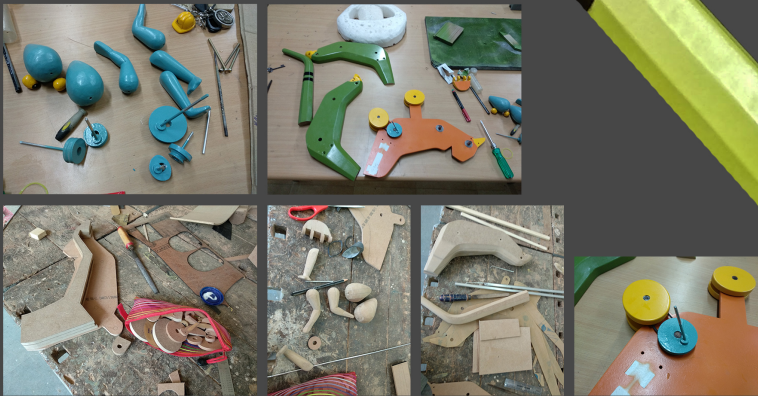

Inspirations: Water Lizard and Toucan

Tail of the lizard is transformed as the handle for the toy

Details of the mechanism

The mouth of the toy is inspired from the toucan bird and it opens and closes as the toy moves, using a cam mechanism

Making Photos

# WALK

Elliptical wheels to create an up and down motion for the toy as it moves forward

Legs, hands and eyes are connected through pulley mechanism. Crank mechanism is used to create a running movement

Wooden Toy for 9 to 15 month old kids
